General information

GIS electric chain hoists are used everywhere, where process safety of lifting systems is important: in the hard three-shift operations in automotive and other high production industries, in dusty or chemical aggressive environments, for outdoor use, for the entertainment industry or for extreme lifting heights in wind power plants.

GIS electric chain hoists and trolleys are made to high standards.

GIS electric chain hoists have been developed and manufactured in Switzerland for more than 55 years.

For many industrial lifting applications standard GIS electric chain hoists offer the ideal solution. Depending on the complexity of the task and the conditions on site we offer GIS special products. A wide range of accessories and options is available.

GIS electric chain hoists and trolleys meet the requirements of the EC Machinery Directive and the relevant EN and DIN standard.

The values listed in the tables are approximate values. Differences due to technical modifications are always possible and subject to change.

Operating conditions

Electric chain hoists are offered in a variety of types and equipment variants and with different safety devices. Therefore, the choice of the chain hoist is of considerable importance. Here, the hazards resulting from the type of use are to be used as a basis whilst also taking the specific conditions of use into account. The selection of the type of the electric chain hoist is dependent on the operating conditions.

Holding loads above people with secondary safety component (D8)

The D8 motor corresponds to a standard industrial electric chain hoist in accordance with EN 14492, DIN 56950 with the difference that the D8 motor is usually used without a handheld controller and in mobile event technology climbing on its chain. As an additional securing measure, the installation of a secondary safety component is required to fix the load.

Holding loads above people without secondary safety component (D8 Plus)

The GIS motor in D8 Plus version is an electric chain hoist which is specifically developed, rated and designed for holding loads above people. It is light and compact in design and thus perfectly suited for mobile use. All components which are in the flow of forces are statically dimensioned for the double of the nominal rated capacity.

Holding and moving loads above people (C1)

The GIS motor in C1 version is an electric chain hoist which is specifically developed, rated and designed for holding and moving loads above people. It is light and compact in design and thus perfectly suited for mobile use and responds to the requirements in accordance with EN 14492, DIN 56950 and IGWV SQP2.

With persons present under the load:				
Use	D8	D8 with secondary safety device	D8 Plus	C1
Assembly and dismantling, set up mode	inadmissible	inadmissible	inadmissible	permissible
Holding loads	inadmissible	permissible	permissible	permissible
Scenic movement	inadmissible	inadmissible	inadmissible	permissible

Electric chain hoists D8

D8 motor in accordance with EN 14492, DIN 56950 and IGWW SQP2

Scope of supply

LPM250 + LP500 / 1000: with eyebolt suspension, LP1600 + LP2500: without suspension, with wear plate as additional chain guide, with terminal board with PMS relay (NF / BF with terminal board without PMS relay), without control, without geared limit switch, without equipping parts, without handles, without control switch, without control cable, without chain bucket, chain safety min. 5.1:1 static

*LPM250 1Ph: only with control voltage 110 V or 230 V, without transformer, without geared limit switch

**LP500 / 1000 1Ph: only with control voltage 42 V, with transformer, without geared limit switch

Eyebolt suspension

Hook suspension rotatable

Electric chain hoists C1

C1 motor in accordance with EN 14492, DIN 56950 and IGWW SQP2

Scope of supply

LP500 - 2500 with eyebolt suspension for load sensor, without load sensor, with geared limit switch with emergency stop, with wear plate as additional chain guide, with terminal board without PMS relay, with 2 brakes (400 V or 230 V), without control, without equipping parts, without handles, without control switch, without control cable, without chain bucket, without preparation for encoder on chain wheel, without encoder, chain safety min. 10:1 static

- Standard voltages: 3 × 400 V / 50 Hz, 3 × 230 V / 50 Hz
- Profile steel chain according to EN818-7, case hardened and manganese phosphated
- Load hook according to DIN 15401, 360° rotatable
- Isolation class F
- Area of application: -15 °C to +50 °C
- Utilisation period 1600 h (DIN EN 14492 A5, ISO M5)

LP500 - 2500 C1

^B in combination with contactor control

^C not suitable for operation as climbing hoist

^D only for the following voltages: 3 x 230 V / 60 Hz, 3 x 460 V / 60 Hz, 3 x 575 V / 60 Hz, 1 x 115 V / 60 Hz, 1 x 230 V / 60 Hz

^E brake voltage 230 or 400 VAC

^F brake voltage 400 VAC

^G in combination with contactor control without emergency stop

^H in combination with terminal board with PMS relay

^I basic version LP1600 / 2500 without suspension

LPM250 - the lightweight

With a weight of only 12 kg and a lifting capacity of 250 kg, the LPM250 in D8 Plus version is the light-weight among the motors in the entertainment industry. It is usable as climbing or stationary hoist without modification and perfectly suited for mobile outdoor use due to its protection class IP65. Four LPM250 fit perfectly into the compact flight case.

LP500 - the versatile

The LP500 was developed as a D8 Plus motor for a lifting capacity of 500 kg. The dead weight is only 23 kg and even with a lifting height of 18 m the overall weight remains less than 40 kg. We offer the LP500 in the versions D8, D8 Plus, C1 or customised and with a large variety of accessories and options. Two LP500 fit into the flight case.

LP2500 - the powerful

The heavy worker among the GIS motors lifts a remarkable 2500 kg as a D8 Plus chain hoist in single fall operation. The maximum lifting capacities in D8 version are 3200 kg (1 fall) respectively 6300 kg (2 falls). For scenic applications, the LP2500 is available as a C1 motor with a maximum lifting capacity of 2000 kg.

GIS AG – the specialist for electric chain hoists and crane systems Founded in 1957 | With own subsidiary in Germany and England | Development and production of electric chain hoists in Switzerland for over 55 years | Certified to ISO 9001 since 1994 | International sales network with over 30 qualified partners worldwide
